**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Shelley Boileau  
Ridge rd  
Dobbs Ferry, New York 10522

cc  
Senator Charles Schumer

Dear Commissioner Martin,

Everyone in the communications industry is trying to keep NEXTEL from the move from 800 to 1900, for whatever reason besides money. I do however have an idea, it may or may not be a good one. Since everyone is trying to keep NEXTEL from moving because it will make them money, why dont they just move the police band to 1900 instead of NEXTEL that way NEXTEL stays where it is, nothing changes in the commercial communications industry, no one makes any added money from it and the Emergency Band belongs solely to its purpose. Like i said, it may or may not be a good idea but its an idea that could work, and would stop the communications industry from bickering over the possible added profit anyone would accrue from any type of move by any other Communications company. This isnt about money, it shouldnt be about the communications corporations who have more than enough money right now as it is anyways out of their greed corruption and narrowmindedness where only money, profit, and the bottom line are the most important things to them. Their bottom line, if not fixed soon, could get one or more of our officers and firefighters killed or in serious danger. This is insanity. It may or may not cost to move the police band to 1900, but if nothing else, would get those corporations worried about their precious bottom dollar to quit their childish bickering over something that shouldnt be anything more than common sense and to help fix this problem that is far exceeded its time to be resolved long ago, long before it ever came to pass. Thank you for your time.

**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Connie Jones  
4 Boger Rd  
Natchez, Mississippi 39120
